I appreciate everyone who has the confidence that I can lead this club for the next 12 months. You will definitely get 110% effort from me. The real challenge is to find enough volunteers to help with the month-to-month operations. We all know the members on which we can depend.

The club's monthly schedule is filling up starting with our annual photo contest and a program by Walt Oldenburg on the history of Koi in May. The mega-auction in June and a new project using recycled "garbage" to create an art object to be displayed at the Erie County Fair pond. The Fair pond clean out is scheduled for Saturday, May 12, starting at 9:00 am.

There are 2 finalists for a restaurant for our December Christmas banquet. More details to follow as soon as one of them is confirmed with the date we need. I have been distributing 'participation' tickets at each meeting. We will use these for a raffle in October where one person will win one free banquet dinner.

The club still needs a secretary. Your duties include attending meetings twice a month, quickly jotting down the important details, and presenting them to the membership. Please speak with an officer or board member if you are interested.

The May refreshments will be presented by Laura & Tony LoTempio. There are only 3 months still open – July, August and October. I will have the sign-up sheet available at the May meeting. The club will reimburse up to \$25.

The next board meeting is Wednesday May 23 at the home of Tim & Denise Moeller in Elma. Everyone is invited to attend.

Sincerely,  
Nancy Wojnowski

Examples of other projects  
done with recycled materials

The club is trying something NEW and creative this year! Please set aside a few plastic items that you use in your daily life and bring them into July's meeting. Examples - Dawn D is bringing Kcups and Ann M. is bringing bottle caps.

We are going to assemble a sculpture to be displayed at the club's Erie County Fair pond this year.

Recycle, reduce, reuse is the theme. We should all do our part to make sure something we use once doesn't sit in a landfill for 500 years, or find its way into our streams, rivers or oceans where it can kill aquatic life. There will be some beauty in this trash, we are going to create it.
